**YOUR LEADING SOURCE  
FOR EDUCATION AND  
MARKETING PRODUCTS**

*A ONE STOP SHOP for the dental community, general practitioners and all dental specialties as well as implant companies, universities, teaching institutions and laboratories.*

## Implant

### Fixed and Removable Implant

We custom fabricate models for all major Implant systems to include fixed as well as removable Implant options. We offer all attachment options and are constantly developing models for new product applications.

## Orthodontic

Our typodonts are custom made, allowing each customer the distinction of differentiating their typodonts from their competitors. They are available in ideal or maloccluded arch forms. Customization options include hard base or flexibase, banding, bracketing, ligation and appliance additions. We also carry anatomically contoured teeth sets and wax forms for teaching tooth movement in a variety of shades and configurations.

## General Dentistry

Our general dentistry models demonstrate all modern dental services available in fixed and removable prosthetic dentistry. They are used by many dental consultants and educators to facilitate better patient and students understanding of current restorative options making them a great educational tool.

## Drillable / Surgical

Edentulous, partially edentulous and full-dentition mandible and maxilla models are available with or without soft tissue for implant drilling and other incision & surgical training exercises.

## University Products

Paradigm is proud to introduce EZE, that allows both instructor and student to quickly and easily prepare or demonstrate utilizing a magnetic quick change typodont system. EZE's integrated features make it one of the most light weight, user friendly easy to use manikins available today.

## Implant

### Fixed and Removable Implant

Models that demonstrate frequently prescribed clinical attachment applications.

## Orthodontic

Typodonts available in ideal or malocclusion arch forms with bands, brackets, attachments and ligation wires.

## General Dentistry

Our extensive full-service laboratory and technical expertise allows us to design, configure and restore dental models for all dental disciplines. Models available demonstrate traditional, conventional and cutting edge restorative applications both in fixed and removable prosthetics.

## Drillable / Surgical

Edentulous, partially edentulous and full-dentition mandible and maxilla models are available for implant drilling and other incision & surgical training exercises.

## University Products

Paradigm is proud to introduce EZE, an innovative magnetic quick change education manikin born of the pursuit of ultimate usability. EZE allows both instructor and student to quickly and easily prepare or demonstrate. EZE's integrated features make it one of the most light weight, user friendly easy to use manikins available today.
